

Name of the project : World Health Day

Local committee : SCOPH

Standing committee : Duhok_Lc

Date :

AIM : to increase the awareness about health generally and common diseases specially , in our community .and educate people about common mistakes done by majority of us as well as having some screening tests for people .

Plan of action : we had 15 different stations each with a specific subject that concern our community to educate our beloved people in Duhok starting with BMI which measured their height and weight and gave some tips for over weight and obese people , and healthy life style booth with gave people leaflets to have a healthier life and asked them to write one bad habit and get rid of the paper as a start for a good change .also there was respiratory booth that show people how smoking acts on the lungs and measured their blood oxygen levels with leaflets talking about lung cancer . In blood donation booth in coordination with blood bank of Duhok we were able to give people the chance to donate their blood and test for ABO blood grouping and HB levels and gave awareness about anemia and its signs and symptoms.

For family station we made 3 subjects concerns all the family begins with women`s health and mental health also pediatric , each had its own leaflets and many subjects concerns the family such as bed ticks and many fun activates for children and adult . there was blood pressure and blood glucose level booths too.

One of our new stations were vaccination booth , in which one of our members, in the name of IFMSA made an application called Hivi for alarms the parents about the time of their child`s vaccination in Kurdish and its available In app store . also skin care station in cooperation with pharmacy students , who talked about sun burns and measured its degrees in people and the ways of using sunscreens , Vit. D , cosmetic tips in different skin types and skin cancer and gaved people sunblockers .

In medical myths we educate people about the wrong practices and superstition in our community such as cutting child`s ear with jaundice will make them better and may others.

In ophthalmology booth we examined there sight and talked about eye`s anatomy and common infections. For first aids we gave different scenarios and how to deal with each situation. Finally there was dental booth in cooperation with dental students who examined child and adults teeth, shared teeth brushes and pates and a visit to collage`s clinic for people with dental problems. There was also entertainment part were a karate team gave a show in the festival and sweets booth which was shared to people there.
