## About Rome, Italy

Italy, Country of South Central Europe Comprises of some of the most varied and scenic landscapes on earth and is often described as a country shaped like a boot. Italy's highest points are along Monte Rosa, which peaks in Switzerland, and along Mont Blanc, which peaks in France. The western Alps overlook a landscape of Alpine lakes and glacier-carved valleys that stretch down to the Po River and the Piedmont. Tuscany, to the south of the cisalpine region, is perhaps the country's best-known region. South of Rome the Apennines narrow and are flanked by two wide coastal plains, one facing the Tyrrhenian Sea and the other the Adriatic Sea.

The whole country is relatively prosperous, certainly as compared with the early years of the 20th century, when the economy was predominantly agricultural. Much of that prosperity has to do with tourism, for in good years nearly as many visitors as citizens can be found in the country. Italy is part of the European Union and the Council of Europe, and, with its strategic geographic position on the southern flank of Europe, it has played a fairly important role in the North Atlantic Treaty Organization (NATO).
