TEACHING ACTIVITIES & SERVICE DEVELOPMENT:

- Teaching activities Since 2014, I have been involved in teaching of undergraduate students of the 3rd, 4th & 6th stages including both theoretical & practical sessions. Also I have been involved in the clinical teaching of postgraduate students of the Kurdistan board of medical specialties and the Iraqi board for medical specializations. Also I have been involved in the supervision of postgraduate studies of high diploma in radiology (about ERCP) and PhD in Biology (about bronchial asthma).
- Service development in college of medicine After assignment as the head of medical department in Duhok medical college, I have been involved in;
 - ❖ Curriculum development and change from the classical teaching system to the new integrated system
 - ❖ Establishing the simulation laboratory for teaching of undergraduate and postgraduate students
 - ❖ Coordinating many workshops and educational activities in the college of medicine
- Service development in Directorate of health I have made tremendous efforts in establishing the Azadi Gastroenterology and Hepatology Center & in developing the services in this center especially in the field of therapeutic endoscopy (ERCP, EUS & interventional endoscopy) & establishing the outpatient clinic that cares for patients with chronic GI diseases.
- Charity works The Azadi Gastroenterology and Hepatology Center provides free of charge services to all the Peshmerga (military forces of the federal region of Iraqi Kurdistan), the families of the martyrs who defended Kurdistan, the ISIS victims, & the refugees from the different parts of Iraq. I have been involved in providing these services since 2014.
