Summary

I am a Ph.D. researcher at Budapest University of Technology and Economics specializing in data analysis and assessment methods, with a strong academic background in sustainable transport planning. Possessing a M.Sc. in transportation planning and engineering and a B.Eng. in computer and software engineering. With proficiency in programming languages like Python, I possess the technical expertise necessary for advanced data analysis and modeling. I have a solid foundation in leveraging computational tools for data analysis and modeling. Currently serving as a lecturer at the University of Duhok (UoD). My research focuses on utilizing data-driven approaches to solve complex transportation problems, employing analytical techniques and assessment methods to optimize transportation systems.
